Security Awareness Training and Phishing Test Service

Security Awareness Training and Phishing Test Service

Threats to businesses are constantly changing as the digital world develops. The methods used by cybercriminals are evolving, with phishing attacks being one of the most common and perilous.

The human factor is always a risk, regardless of how sophisticated your security measures are. Cybercriminals often use phishing emails and social engineering to target employees. This can lead to data breaches, financial losses, and damage to the company's reputation. Training your staff in security awareness helps them be better prepared to identify and stop attacks.

Cybercriminals are increasingly targeting employees with sophisticated phishing attacks that can lead to devastating data breaches and financial losses.

We provide comprehensive training to help your employees stay vigilant and secure.

Expert Guidance and Dedicated Support: Our cybersecurity and training experts ensures the success of your Security Awareness Training program. We manage the entire process, from initial assessment to ongoing updates, offering guidance, support, and best practices. Focus on your core business while trusting that your workforce is ready to combat cyber threats.

Compliance and Professional Development: We help you meet industry-specific compliance requirements and provide evidence of training completion. Moreover, employees will have the opportunity to earn certificates upon successfully completing the training, enhancing their professional development and boosting their cybersecurity skillset.

Features

Customised Security Awareness Training

Our expert team will work closely with you to create a tailored Security Awareness Training program.

We will design a curriculum that addresses your organisation's specific threats and compliance requirements.

Features

Simulated Phishing Tests

Our service includes the creation and deployment of realistic phishing simulations.

These tests mimic real-world phishing attacks and provide valuable insights into your employees' susceptibility to social engineering tactics.

Features

Adaptive Learning and Continuous Improvement

Cybersecurity threats are ever-evolving. We continually update your Security Awareness Training to ensure your employees stay equipped with the latest knowledge and best practices for defending against emerging cyber threats.

Features

Comprehensive Reporting and Analytics

We provide detailed reporting and analytics on employee progress and performance.

We will keep track of employee progress, identify trends, and spot individuals who may need additional training.
